**PCSW Presentation January 2018
Feedback Sheet**

Student:

Olly Binns

Overall Grade (1-10): 9 – 10

Please ring a single score under each heading, and enter a comment for the student.
As a calibration guide: 0 = "without merit"; 5 = "satisfactory"; 7 = "good"; 10 = "perfect".

A: Title and Overview	0 1 2 3 4 5 6 7 8 9 **(10)**

Good title which makes the point!
Good overview of the application area + basic approach.

B: Introduction to the Problem and its Context	0 1 2 3 4 5 6 7 8 **(9)** 10

A bit rushed – but your points do come across.
Very well- structured, + very clear about the difficulties you
have faced.

C: Presentation of Content	0 1 2 3 4 5 6 7 8 **(9)** 10

Good engagement with the audience, but you need to
come over more confidently. Slowing it down would help.
You are taking the audience with you ... very good
explanations. The impact stuff very good – could possibly have
put earlier on.

D: Quality of the slides	0 1 2 3 4 5 6 7 8 9 **(10)**

A lot more information needed on the earlier slides really – the
'research slide' + 'parallelisation' were fine, but earlier ones
a bit too sketchy. It got a lot better later on, so don't
worry too much about that.

E: Structure and Balance of the Presentation	0 1 2 3 4 5 6 7 8 9 **(10)**

F: Engagement with and understanding of the audience	0 1 2 3 4 5 6 7 8 9 **(10)**

I like the humour

Other comments:
Speak slower, if possible.
Keep the humour – it works very well.
